

ADJUSTMENT OF SEPARATING KNIVES

IMPORTANT: AFTER EACH DELIVERY OF CLAYS, EVEN IF IT IS A DELIVERY FROM THE SAME SUPPLIER AS BEFORE, IT IS NECESSARY TO ADJUST THE SEPARATING KNIVES.

To properly adjust the separating knives, leave only two clays in the carousel, one on top of the other. Then, by manually rotating the carousel, make sure that both separating knives "cut in" exactly into the gap between the two clays.

If the lower or upper clays is cut by one of the knives, they should be raised or lowered accordingly by turning the screws (1).
